The purpose of this Market Information Circular (MIC) is to advise you of a mandatory Click Trade upgrade. On Monday, July 31st the ISE will be upgrading its trading system to the R7 platform.

This upgrade is a “dual boot” version, meaning you can download the R7 compatible Click Trade at any time prior to the July 31st cutover. The R6 version of Click will continue to run until the 31st.

The upgrade will be transparent to Click Users. The purpose of the upgrade is to insure that all Click Users are compatible with the R7 trading platform as of the cutover date, July 31st.

This will be the last time the ISE upgrades the Click Trade software. All Click users need to be migrated to our new PreclSE Trade software. The migration to PreclSE is ongoing. Please refer all inquiries regarding PreclSE to Jeanine Hightower at jhightower@iseoptions.com or 212-897-0357.

Installing the CLICK Trade upgrade

To install the CLICK Trade upgrade:

1. Click the **Member Login** quick link on ISE Web site, www.iseoptions.com.
2. Type `click` in the **Name** and **Password** fields.
3. Click **Login**.
The CLICK page is displayed.
4. From the Software Downloads menu, click the **CLICK R6 5.7_2.6** link.
The link to the software is displayed.
5. Click the link and select **Save** to download the file.
6. Double-click on the file to install the software.

Further assistance

If you have difficulty logging on to the new software, or experience any software performance degradation, please contact ISE Market Operations at (877) 473-9989.

Any representative on the desk will be able to assist you.
