Information on the Notes

Merrill Lynch & Co., Inc. (the "Issuer") has issued Strategic Accelerated Redemption Securities ("Notes") linked to the Dow Jones Industrial Average (the "Index"). The Notes were priced at \$10 each and mature on August 31, 2010.

The Notes are senior unsecured obligations of the Issuer that provide for an automatic call of the Notes if the closing level of the Index on any Observation Date is equal to or greater than the Starting Value of the Index, as determined on August 27, 2008, the date the Notes were priced for initial sale to the public (the "Pricing Date").

If the Notes are called on any Observation Date, investors will receive on the Call Settlement Date an amount per unit (the "Call Amount") equal to the \$10 Original Public Offering Price of the Notes plus the applicable Call Premium. If the Notes are not called, the amount investors receive on the maturity date (the "Redemption Amount") will not be greater than the Original Public Offering Price per unit and will be based on the direction of and percentage change in the level of the Index from the Starting Value to the Ending Value, as determined on the final Observation Date. Investors must be willing to forego interest payments on the Notes and be willing to accept a repayment that may be less, and potentially significantly less, than the Original Public Offering Price of the Notes. Investors also must be prepared to have their Notes called by us on any Observation Date.

If called on September 10, 2009, investors will receive \$11.3060 per Note. If called on March 10, 2010, investors will receive \$11.959 per Note. If called on August 24, 2010, investors will receive \$12.612. The Call Premium is 13.06% of the original offering price of the Notes.

If held to maturity, investors will receive the following:

- If the Ending Value of the Index is equal to or greater than the Threshold Level:

\$10

- If the Ending Value of the Index is less than the Threshold Level:

$$\$10 + [\$10 \times ((\text{Threshold Level} - \text{Ending Value}) / \text{Starting Value}) \times 100\%]$$

The Starting Value of the Index is 11,502.51. The Ending Value of the Index will be the closing level of the Index on August 24, 2010. The Threshold Level is 10,352.26.

Please see the prospectus for the Notes for more details regarding the calculations and the mechanics of the Notes.

It is expected that the market value of the Notes will depend substantially on the value of the Index and may be affected by a number of other interrelated factors including, among other things: the general level of interest rates, the volatility of the Index, the time remaining to maturity, the dividend yield of the stocks comprising the Index, and the credit ratings of the Issuer.

Trading in the Notes on NASDAQ is on a UTP basis and is subject to [NASDAQ equity trading rules](#). The Notes will trade from 7:00 a.m. until 8:00 p.m. Eastern Time. Additional risks may exist with respect to trading the Notes during Nasdaq's Pre-Market and Post-Market sessions, when the Index's value may not be disseminated.

Trading of the Notes on NASDAQ is subject to the provisions of [NASDAQ Rule 2310](#). Members recommending transactions in the Notes to customers should make a determination that the recommendation is suitable for the customer. In addition, members must possess sufficient information to satisfy the "know your customer" obligation that is embedded in the NASDAQ Conduct Rules.
