Information on the Notes

AB Svensk Exportkredit (the "Issuer") has issued Capped Leveraged Index Return Notes ("Notes") linked to the MSCI EAFE Index (the "Index"). The Notes were priced at \$10 each and mature on July 26, 2010.

As more fully set forth in the Prospectus Supplement, the Notes are senior, unsecured debt securities and are not guaranteed or insured by the Federal Deposit Insurance Corporation ("FDIC") or secured by collateral. The Notes will rank equally with all of the Issuer's other unsecured and unsubordinated debt, and any payments due on the Notes, including any repayment of principal, will be subject to the credit risk of the Issuer.

The Notes provide a leveraged return for investors, subject to a cap, if the level of the Index increases moderately from the Starting Value of the Index, determined on January 7, 2009, the date the Notes were priced for initial sale to the public, to the Ending Value of the Index, determined on the Calculation Days shortly prior to the maturity date of the Notes. Investors must be willing to forego interest payments on the Notes and willing to accept a return that is capped or a repayment that is less, and potentially significantly less, than the original offering price of the Notes.

At maturity, investors will receive:

- If the Ending Value is less than the Threshold Value:
$$\$10 + [\$10 \times ((\text{Ending Value} - \text{Threshold Value}) / \text{Starting Value}) \times 100\%]$$
- If the Ending Value is equal to or greater than the Threshold Value:
$$\$10$$

- If the Ending Value is greater than the Starting Value:

$$\$10 + [\$10 \times ((\text{Ending Value} - \text{Starting Value}) / \text{Starting Value}) \times 200\%]$$

Subject to a maximum total payment at maturity of between \$11.60 to \$12.00 per Note (yet to be determined).

The Starting Value for the Index will be determined shortly. The Ending Value will be determined near the maturity date. The Threshold Value will also be determined shortly.

Please see the prospectus for the Notes for more details regarding the calculations and details regarding the Index.

It is expected that the market value of the Notes will depend substantially on the value of the Index and may be affected by a number of other interrelated factors including, among other things: the general level of interest rates, the volatility of the Index, the time remaining to maturity, the dividend yield of the stocks comprising the Index, and the credit ratings of the Issuer.

Trading in the Notes on NASDAQ is on a UTP basis and is subject to [NASDAQ equity trading rules](#). The Notes will trade from 7:00 a.m. until 8:00 p.m. Eastern Time. Additional risks may exist with respect to trading the Notes during Nasdaq's Pre-Market and Post-Market sessions, when the Index's value may not be disseminated.

Trading of the Notes on NASDAQ is subject to the provisions of [NASDAQ Rule 2310](#).
